Disease Suppression Studies

Studies conducted by various agencies; including the USDA, show suppression of plant diseases through chloride applications.

Chloride research has shown that it plays an important role in suppression of fungal leaf and root diseases.

With

Studies and Research Include these Diseases:

- ◆ **Mildew**
- ◆ **Take-all**
- ◆ **Leaf Rust**
- ◆ **Tan Spot**
- ◆ **Spot Blotch**
- ◆ **Powdery Mildew**
- ◆ **Septoria**
- ◆ **Common Root Rot**

Crop disease is one area of crop production that can be controlled and minimized by applying the right products at the right time.

Left untreated, crop disease will have a severe effect on overall crop production and quality.
