

Grow Better Grass!

When it comes to growing grass we know that high rates of nitrogen will grow tonnage; but not quality grass. To grow high feed value quality tonnage grass you must provide the plants with the vital nutrients and minerals they need; our products and programs are formulated to do just that! We supply the very best nutrients to maximize both quality and tonnage.

Grass Program Per Acre Rates

NCal 3-5 Gallons

F14 1 Gallon

F14

NCal is a premium combination of our 100% available liquid calcium and slow-release nitrogen. Goes to work immediately! When calcium is available all nutrients are available. **NCal** contains a slow-release nitrogen; 30% is available immediately and 70% is spoon fed to the plant over the next 8-9 weeks. Immediate nitrogen boost PLUS nitrogen that lasts!

F14: Combination liquid formula that combines all our best-selling products into an easy to use package. F14 is rich in carbon based fertility, trace minerals, humic acids, plus 14% slow release nitrogen for exceptional growth and nutrition. F14 is designed to increase feed value and allow livestock to get their nutrients through the plant for better results!

Application Rates: Suggested spray rate is 10 gallons water plus **NCal** and **F14** rates.

Prices

NCal \$55 per 5 gallon pail, \$605 per 55 gallon drum, \$2200 per 275 gallon tote.

F14 \$145 per 5 gallon pail, \$1595 per 55 gallon drum, \$7425 per 275 gallon tote.
