

At U.S. Ag, LLC we believe that strong healthy high-yield crops can be grown without using harmful chemicals. That is why we have introduced our own nature friendly CleanGreen MD that is made from all natural plant oils. These structured plant oils are extremely effective in controlling a wide variety of insects. The extracts are non-persistent, biodegradable decomposing rapidly in the environment.

We believe that by using a nature friendly product to eliminate pests that we can help protect our environment by avoiding saturating our soils with hazardous chemicals found in today's pesticides and provide safe residue-free produce.

Help to Protect the Land and Our Children by Using CleanGreen[®] MD to Safely & Naturally Eliminate Pests Today!

MD Will Help Keep Your Crops Pest Free!

CleanGreen MD does an excellent job at knocking out insects. It's superior mechanical action makes it an ideal product for eliminating crop pests.

Our Land Deserves a Safe Clean Product.

Insects are a big problem in today's crop production. Aphids, locusts, thrip and worms are just a few species that can devastate crops in a matter of days. Chemical pesticides are now used by practically all growers to control these pests.

However, chemical pesticides are not good for people or the environment. Synthetic pesticides have been associated with everything from cancer to neurological disorders in humans and animals. With this in mind it is the planet's best interest for growers to seek out and use safer alternatives and that is where MD comes in...
