

A Phenomenal Combination

Our formula combines our 100% active and available liquid calcium with our premium concentrated fish fertilizer that delivers an outstanding fertility response.

1 gallon of our super concentrated fish easily outperforms 10 gallons of regular fish hydroslate!

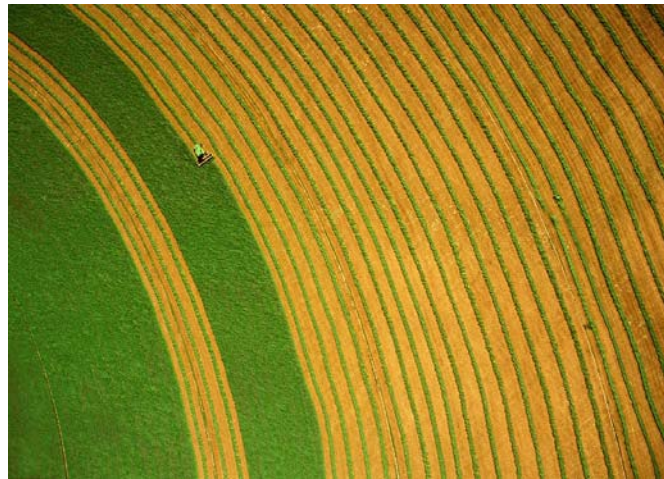

Our liquid calcium contains 11 lbs of active available calcium per gallon! For comparison, it takes 1 ton of dry ag lime to equal 1 gallon of our highly concentrated Liquid Calcium!

Together our fish & calcium have proven to be an explosive combination yielding tremendous bang for the buck returns!
